

OFFICIAL BULLETIN 1

Issued 7 February 2016 – 13:30hrs

Amendments to 2016 Championship Regulations

Appendix 2

SRC Subaru Cup Technical Regulations

6.7 The exhaust manifold must remain standard but the system is free

The above regulation has now been relaxed to include the fitment of aftermarket tubular steel style exhaust manifolds. This on the grounds of relative cost of replacement OEM parts, their durability in use and the relatively low power increase that is gained over OEM parts.

This Regulation will now read:

6.7 The exhaust manifolds and exhaust system is free
